

2025 **Fan** CATALOGUE

Welcome to the Mercator 2025 Fan Catalogue

For over 60 years, Mercator has been a trusted leader in the air movement industry, continuously innovating and evolving to provide customers with the best solutions for their homes and businesses. This Fan Catalogue marks a continuation of that legacy, showcasing our dedication to superior quality, cutting-edge technology, and captivating design.

We understand the profound impact that air quality and temperature have on well-being and productivity, and we are driven by a passion to create environments that are both comfortable and stylish.

Every Mercator product is meticulously crafted with the highest quality materials and features state-of-the-art technology. We prioritize energy efficiency and sustainable practices, ensuring that our products are not only effective but also environmentally responsible.

Our commitment extends beyond product quality. We offer comprehensive merchandising solutions and exceptional customer service to support your business. Our knowledgeable team is always available to answer your questions and provide expert advice, ensuring you find the perfect air movement and heating solutions for your specific needs.

Embrace the legacy of innovation and comfort with the Mercator fan catalogue. Discover the perfect air solutions and heating options to elevate your space and enhance your well-being.

General Information

All hard wired electrical products must be installed by a qualified electrician.

Measurements

All measurements within this manual are in millimeters and are designed to be used as a guide only. Measurements may vary slightly to those within this manual and may be modified for design or enhancement purposes.

Mercator reserves the right to cancel or change all products without any prior notice. EXT indicates the extension from the wall or ceiling to the outer edge of the product.

Images

Minor design changes or alterations may result in slight variations between the product shown in this catalogue and the final product.

Icons

LED

This product features energy efficient LED lamps or integrated LED.

Changeable Colour Temperature

This product feature allows you to change the colour temperature of light by the click of an internal switch.

UV Resistant

This product contains UV stabilising properties to protect from the long-term UV degradation effects from ultraviolet radiation.

Eco-Motor

Low energy consumption, super high airflow with whisper quiet operation.

Alternating Current

Traditional style motor featuring high airflow. Higher energy consumption when compared to a DC motor.

With Light Model

This model is available with light or can be adapted to add a separate light kit.

WiFi

Wi-Fi is a widely available method of wireless communication used in some of our Mercator Ikuü products. There are no additional costs surrounding hubs/bridges/gateways.

Zigbee

Zigbee is a reliable and low latency method of wireless communication used in some of our Mercator Ikuü products. Mercator is a member of the Zigbee alliance.

a hot summer or cold winter*

Reduce Energy Costs & Increase Comfort

Reduce energy costs and increase comfort
in your home with the ability to automate,
set schedules and control your home
wherever you may be!

Mercator Ikuü can be used to make your
home smarter, or as a whole of home
solution. There is something for everyone.

Smartphone not included

UNIVERSAL IR REMOTE

SBIR01

- Can be used to control any IR device such as an air-con or TV
- Comes pre-programmed with a range of popular split system remotes
- Use your existing remote to 'learn' any IR split system remote control – regardless of make or model
- In-built temperature and humidity sensor

Smartphone not included

SMART AC FAN CONTROLLER

SSWF01G / SSWF01G-WIFI

- Use to convert most AC ceiling fans for smart control
- Zigbee and WiFi versions available; Zigbee requires Mercator Ikuu hub
- 150W max.
- Neutral wire required

● White

LEDs indicate when the fan is switched on

Smart Wall Controller for AC fans

Ceiling Fans & Accessories

Choosing the right fan for you

LOCATION COMES FIRST

The most important factor in choosing a ceiling fan for your space is identifying where the fan will be installed.

Dry, indoor location

Choose from any of our fan range.

High-humidity indoor or under-covered outdoor location

Choose from ABS or 316 stainless steel fan ranges. Fans with plywood blades are not recommended.

Outdoor location with likely direct contact with water

Choose a fan with high ingress protection (IP) rating.

FAN SIZE

The room size where the fan will be installed can serve as a general guide to your fan size.

Fan size refers to the fan diameter.

We recommend placing your fan in the middle of room for best performance and away from the direct path of ventilating hole.

For oversized space or long corridor you should consider installing multiple fans.

STYLE

The style you choose is an individual decision, however timber blades and DC fans are quieter and better suited for bedrooms, while metal and ABS fans generally move more air and are better suited to high-traffic areas.

FEATURES

We offer the widest range of ceiling fans with a variety of features. Pick a fan with the most features that matter to you.

Fan control

Choose from wall control, pull chain control or remote control. For AC ceiling fans, a retrofit remote controller offer additional fan features, including network connectivity. Smart features such as voice control and scheduling are available.

Light kit

Ceiling fans can be supplied with or without a light fitting. The light fitting may accept retrofit globes or come with an integrated light source. The light can vary in style, ease of control, degree of light control and power it consumes. There are also fans where a matching light kit is sold separately. Fans fitted with lights are generally more

suitable in smaller spaces as the main source of overhead light whereas larger spaces usually have alternative primary light sources.

CEILING HEIGHT

Recommended downrod length is based on ceiling height. Mandatory minimum distance from floor to fan blades is 2.1 metre.

AIRFLOW

We provide airflow measured in cubic metres per hour for ceiling fans. The greater the number, the greater the air moved.

In Australia, there is currently no prescribed airflow test procedure for ceiling fans. Therefore, airflow performance can be derived by manufacturers using varying test methods of their own choosing, including inexpensive and unqualified in-house test set up.

Mercator adopts the trusted U.S. Department of Energy (DOE) airflow test procedure for our ceiling fans range and conduct all our airflow test in fully accredited test laboratory.

OLD TEST PROCEDURE

The ceiling fan is suspended by a downrod 40" from test ceiling and 6" above a cylinder. The cylinder is 8" larger in diameter than the fan.

IMPROVED TEST PROCEDURE

The ceiling fan is mounted directly to the ceiling using the supplied down rod. Hugger fans are flush mounted. There is no cylinder below the fan. A sensor arm detects airflow from various test points along the length of the blade.

The updated DOE airflow test procedure, as adopted by industry leaders, are very specific to ensure consistency across published airflow numbers. The performance produced by accredited test method allows consumer to better associate the airflow number they see on packaging to what they will actually "feel" when they use their ceiling fans at home.

Mercator has seen 10% - 45% reduction in cubic metre per hour (m³/h) being realised with the improved DOE testing, compared to the same products tested under the previous procedure.

Initially, the lower airflow numbers can be confusing. It is important to understand that the lower numbers don't mean less airflow is being generated. **The fans, and their airflow, have not changed. The way that airflow is being measured has changed.**

At Mercator, we strive to provide you with trusted ceiling fan performance. We recommend consumers enquire about airflow test or experience a fan performance in person whenever possible for satisfactory purchase outcome.

CHOOSE THE CORRECT FAN FOR THE RIGHT ROOM SIZE

SMALL ROOM
3.1m x 3.1m or Smaller

Floor smaller

LARGE ROOM
3.7m x 3.7m
to 5.5m x 5.5m

1.2m to 1.4m Fan

GREAT ROOM
6.1m x 6.1m or Larger

1.5m Fan or larger

AC Ceiling Fans

Well studied electromechanical technology and durable fan construction that stands the test of time.

REASONS FOR CHOOSING AN AC CEILING FAN:

- Can be controlled by a hardwired wall controller or a remote control
- Wider designs and styles available
- More affordable than a comparable DC fan
- Extensive features with advanced smart remote controllers

DC Ceiling Fans

Well studied electromechanical technology and durable fan construction that stands the test of time.

REASONS FOR CHOOSING A DC CEILING FAN:

- More energy efficient than comparable AC fans
- Can be much quieter than comparable AC fans
- More speeds and fan/light control via remote handset
- Typically weighs less than an AC fan
(easier to handle and install)
- Smart fan option available

FRMDC99 DC Fan Wall Controller

- The FRMDC99 is a DC wall controller suitable for use with most ceiling fans with a DC motor
- It can be used for fans with or without light, with multiple functions to offer
- Fan On/Off
- 6 speed settings with light indicator
- Light On/Off
- Dimmable
- 4 pre-set colour temperatures: warm white, neutral white, cool white, daylight white
- Consistently changeable colour temperature
- 1, 4 & 8 HR Timer

Downrod Selection Guide

Recommended downrod length is based on ceiling height. Mandatory minimum distance from floor to fan blades is 2.1m.

Note: downrods and wiring looms are sold separately. Ensure both parts are ordered for a complete unit. For more information for each ceiling fan's respective downrod accessories, please refer to their individual pages.

Portable Fans & Wall Fans

Functional fans ensuring high-grade production.
Suitable to any indoor or outdoor space.

- 19 variable speeds
- Remote controlled oscillation
- Normal/Natural/Sleep operation modes
- 1-9 hour timer
- Tiltable fan head
- 1.8m flexible power cord with plug supplied
- 12 months warranty

Warranty & Technical Information

1 LIMITED REPAIR / REPLACEMENT WARRANTY

MERCATOR offers a repair or replacement warranty on MERCATOR products in cases where the product fails due to defective materials or workmanship. Please refer to the LIMITED WARRANTY PERIOD TABLE which sets out the relevant warranty and warranty period which MERCATOR grants to the purchaser of the MERCATOR product. The warranty period begins from the date of purchase. Also, please refer to WHAT IS NOT COVERED BY THE LIMITED REPAIR / REPLACEMENT WARRANTY.

You must have proof of purchase (such as the original dated purchase receipt) from an authorised MERCATOR retailer to make a warranty claim. In addition, a certificate of compliance for the installation as required by law from the installing electrician is required for products requiring installation by licensed electricians. Please refer to the Instruction leaflet for the MERCATOR product purchased, which will state if the product is required to be installed by a licensed electrician. Warranty claims without this documentation will NOT be accepted.

Repairs / Replacements

MERCATOR Products presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may be used to repair the goods.

Balance of Warranty

To the maximum extent permitted by law, any replaced or repaired products by MERCATOR are covered only by the balance of the warranty period remaining from the date of purchase of the original MERCATOR product.

2 IN-HOME REPAIR / REPLACEMENT WARRANTY

In addition to the limited warranty terms set out under section (1) above, the in-home warranty applies to all lighting products which are hard wired to the electricity supply at residential premises and are required to be installed by a licensed electrician.

Where a consumer asserts that a product installed in-home is faulty, and a MERCATOR service agent has attended at the property, A SERVICE CALL FEE WILL BE CHARGED TO THE CONSUMER IF:

The product is deemed to be a non-MERCATOR product;

1. There is nothing wrong with the MERCATOR product or to the extent that the failure is not a failure of the product to perform in accordance with its published features and specifications as reasonably determined by MERCATOR;
2. The original installation of the MERCATOR product was not carried out by a licensed electrician;
3. The installation is not performed in accordance with the relevant MERCATOR product installation instructions;
4. The defects have been caused by incorrect application or abuse or misuse by the consumer of the MERCATOR product.

In cases of in-home repair/replacements in areas outside the coverage of MERCATOR service agents, MERCATOR will reimburse customers a standard fee of \$82.50 (inc. GST) for using their own electrician. Any service request must be arranged with the MERCATOR warranty department and obtained an Approval Reference Number (ARN) before calling your own electrician. Reimbursements will not be made for call-out fees or other costs without prior approval in writing of the MERCATOR warranty department. In the circumstances where an emergency has arisen out of normal business hours and the MERCATOR warranty department cannot be contacted to dispatch a service agent to the premises, MERCATOR will reimburse customers their reasonable costs (as determined by MERCATOR) for using their own electrician.

3 WARRANTY TRANSFER

If the ownership changes on the dwelling where the MERCATOR product is installed, the balance of the warranty period passes to the new owner provided the proof of purchase (such as the original dated purchase receipt) from an authorised MERCATOR retailer is retained by the new owner. In addition, a certificate of compliance for the installation as required by law from the installing electrician is required for products requiring installation by licensed electricians.

4 AUSTRALIAN CONSUMER LAW

The benefits given to you in this warranty document are in

addition to your other rights and remedies under a law in relation to the products to which this warranty document relates.

"YOUR CONSUMER RIGHTS"

"Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure."

Subject to "Your Consumer Rights" outlined above, but otherwise to the maximum extent permitted by law, MERCATOR will not be liable for any consequential or indirect loss or damage suffered or incurred by you in relation to a MERCATOR product, including but not limited to loss of use, loss or damage for business interruption, or profits.

5 WHAT IS NOT COVERED BY THE LIMITED REPAIR / REPLACEMENT WARRANTY OR THE IN-HOME REPAIR/ REPLACEMENT WARRANTY

Subject to "Your Consumer Rights", but otherwise to the maximum extent permitted by law, the MERCATOR warranties provided in this document will not cover the following:

1. MERCATOR products that are not purchased from an authorised retailer and installed in Australia.
2. Where installation was not carried out by a licensed electrician as required.
3. MERCATOR products not installed in accordance with the product's installation instructions or specifications.
4. MERCATOR products not used in accordance with the instructions for use or specifications.
5. Defect, damage or failure to a MERCATOR product resulting from misuse, accident, neglect, abuse, tampering, modifications or unauthorised repairs of any kind by any person.
6. Damages not caused by a fault in the MERCATOR product materials or workmanship. Defect, damage or failure to a MERCATOR

product resulting from any acts of God, including damages from lightning, power grid fluctuations, or power surges.

7. Minor variations of speed may be evident between different fans, including the same model.
8. Replacement of light sources (globes, fluorescent tubes, etc) unless specified.
9. Replacement of batteries supplied with certain products.
10. Power supply "noise", intermittent "humming" or other influences from mains power delivery infrastructure. Signals sent through the power grid by the electricity provider for the control of off peak hot water, street lights and other devices may cause an intermittent humming noise in your MERCATOR product. Filters for blocking/reducing such signals are available in Australia at the customer's expense. These noises do not indicate the MERCATOR product is faulty.
11. Damage caused by alternative power systems (for example: solar inverters, etc.).
12. Water damage of any kind caused by inappropriate placement of fittings not IP rated for that location.
13. The cost of renting, obtaining and using special access equipment (i.e. scaffoldings, scissor lifts, etc.) for accessing products installed at a height of greater than 3.0 meters.
14. Travelling costs incurred by MERCATOR personnel or service agents traveling greater than 25 Km from a MERCATOR authorised service agent. The purchaser must meet these traveling costs.
15. Where the product does not perform to the expectation of a user but it does perform to its published features and specifications.
16. Non-structural corrosion damage of non-316 stainless steel components such as surface rust or minor rust.
17. Liability for consequential loss or claims for damage to furniture, carpets, walls, ceilings, foundations or any other event either directly or indirectly resulting from a faulty product or accessory to the maximum extent permitted by law.

6 COMMERCIAL USE

Mercator products which specifically designed for commercial use are designated as Commercial Use Products on the product packaging.

All Mercator ceiling fan/bathroom heater/exhaust fan products are designed for domestic use unless otherwise specified in the warranty documentation supplied with the product.

Where products designed for domestic use are used in a commercial environment/commercial premises one third of the domestic warranty as supplied with the product applies.

THIS WARRANTY IS VALID IN AUSTRALIA ONLY

HOW TO MAKE A WARRANTY CLAIM

- A. Limited repair/replacement warranty: Please return the faulty MERCATOR product together with a copy of the proof of purchase, and if required, a certificate of compliance for the installation of the product by the licensed electrician who installed the product, to the authorised MERCATOR retailer where the product was purchased. To the maximum extent permitted by law, the customer must bear the costs and expenses of claiming under this warranty, including but not limited to the cost incurred in freight, postage, handling, travel, dismantling or reinstalling the product.
- B. In-home repair/replacement warranty: Where an in-home warranty applies, please phone the MERCATOR customer care hotline 1300 55 22 55 (select option 2.) Australia for all in-homewarranty enquiries and do not phone or return the product to the retailer. Do not uninstall or return a hard-wired product to the retailer unless advised to do so by a MERCATOR customer service representative.

IN CASE OF MISSING ACCESSORIES OR PARTS, PLEASE CONTACT MERCATOR CUSTOMER SERVICE BEFORE INSTALLATION OF THE PRODUCT. IF YOUR PRODUCT IS DEFECTIVE OR EXCESSIVELY NOISY, PLEASE CONTACT MERCATOR CUSTOMER SERVICE BEFORE THE ELECTRICIAN LEAVES THE RESIDENCE WHERE THE INSTALLATION IS TAKING PLACE.

Isolation switches for Ceiling Fans

Ceiling fans are prescribed devices under Australian electrician regulations and must be tested and certified to Australian standards before they can be sold by importers/manufacturers.

As part of the certification process it is a requirement of standard AS/NZS 60335.1 (Household and similar electrical appliances - Safety) that the following clause applies:

7.12.2 if a stationary appliance is not fitted with a supply and a plug, or with other means of disconnection from the supply mains having a contact separation in all poles that provide full disconnection under overvoltage category III conditions, the instructions shall state that means for disconnection be incorporated in the fixed wiring in accordance with the wiring rules.

All ceiling fan instructions include the requirement for installation of an isolation switch to meet this requirement.

Being a stationary appliance not fitted with a plug and cord a ceiling fan must be installed by a licensed electrical contractor in accordance with the Australian wiring rules (AS/NZS 3000.).

The following clause of AS/NZS applies when installing a ceiling fan:

1.7 Selection and installation of electrical equipment.

1.7.1 Essential requirement;

- (a) Operate in a safe and reliable manner in the course of normal operating conditions; and
- (b) Not cause any danger from electrical shock, fire, high temperature or physical injury in the event of reasonably expected conditions of abnormal operation, overload, fault or external
- (c) Be installed in accordance with the manufacturer's instructions.

In summary, it is requirement of the standards which apply to the product that an isolation switch be installed and a requirement of the wiring rules that the product be installed to manufacturer's instructions.

Any installation which does not meet both of the above requirements is not deemed to be a safe installation.
